

TURF SELECTION GUIDE

Turf is selected by use, not colour alone.

Pile height, yarn, density, backing, drainage and infill need to match the application and the complete installed system.

Landscape

TYPICAL PILE 1.5 to 2.0 in.
TYPICAL FACE WEIGHT 50 to 80 oz.

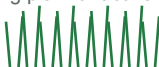

Natural appearance and resilience for lawns, courtyards and general landscape use.

Pet

TYPICAL PILE 1.0 to 1.5 in.
TYPICAL FACE WEIGHT 40 to 60 oz.

Shorter, accessible pile with drainage and a cleaning plan for active pet areas.

Putting

TYPICAL PILE 0.4 to 0.75 in.
TYPICAL FACE WEIGHT 40 to 60 oz.

Dense, short surface selected for ball roll, cup design and intended practice speed.

Play

TYPICAL PILE 1.25 to 1.75 in.
TYPICAL FACE WEIGHT 40 to 60 oz.

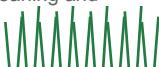

Part of a tested system where fall attenuation, access and equipment zones matter.

Commercial landscape

TYPICAL PILE 1.0 to 1.75 in.
TYPICAL FACE WEIGHT 50 to 80 oz.

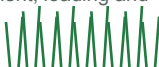

Dense surface coordinated with traffic, furniture, cleaning and replacement access.

Sport and training

TYPICAL PILE Application specific
TYPICAL FACE WEIGHT System specific

Purpose-built turf and infill selected around movement, loading and governing requirements.

WHAT TO COMPARE

The sample questions that prevent a poor match.

Request the current manufacturer specification and warranty for the exact product proposed. Generic category ranges are not product claims.

APPLICATION

What will happen on the surface every day?

Start with users, traffic, pets, furniture, play or ball roll.

YARN AND PILE

What creates the feel and appearance?

Compare pile height, yarn shape, sheen, colour blend and recovery.

FACE WEIGHT

How much yarn is above the backing?

Useful for comparison, but density alone does not prove suitability.

BACKING

How does the product drain and hold together?

Confirm perforations or permeability, coating and seam compatibility.

INFILL

What supports fibres and changes performance?

Confirm type, rate, maintenance and suitability for the intended use.

COMPLETE SYSTEM

What sits below and around the turf?

Confirm excavation, base, slope, edges, drainage and transitions.

REGIONAL MATERIAL-ONLY PLANNING RANGE

\$5.50 to \$8.50 / ft2

turf before accessories and delivery
