

RESIDENTIAL PET SYSTEMS

Pet turf selected for cleanup and daily use.

A pet area needs more than a product labelled pet-friendly. Drainage access, base construction, infill, edges and a repeatable cleaning routine all affect long-term performance.

INSTALLED PLANNING RANGE

\$17 to \$22 / ft²

complete pet-system planning range

● **Shorter pile**

Accessible fibres can make rinsing, debris removal and brushing easier.

● **Drainage path**

Backing, aggregate, slope and discharge need to work as one system.

● **Cleaning plan**

Prompt waste removal, rinsing and approved cleaners support odour control.

A COMPLETE SYSTEM

The visible turf is only one layer of the project.

Drainage, base depth, compaction, seams, edges and infill determine how the surface performs after installation.

Representative image. Planning ranges exclude HST and require site review.
