

BACKYARD PUTTING GREENS

A practice green designed for the shots you want.

Putting performance comes from the surface, shaped base, cups, contours, fringe, infill and maintenance. Start with available space and intended practice, then choose the system.

COMPACT GREEN PLANNING RANGE

\$26 to \$35 / ft2

typical under 400 ft2 before HST

● Define the practice

Straight putts, breaks, fringe and chipping change the design.

● Build the shape

Base tolerances and contours influence roll and drainage.

● Finish deliberately

Cup locations, seams, fringe transitions and grooming affect use.

A COMPLETE SYSTEM

The visible turf is only one layer of the project.

Drainage, base depth, compaction, seams, edges and infill determine how the surface performs after installation.

Representative image. Planning ranges exclude HST and require site review.
